STREAMLIGHT USB REDEFINING CONVENIENCE. USE, CHARGE, REPEAT.

**MULTI-FUEL LIGHTS, USB COMPATIBILITY, PORTABLE POWER.
STREAMLIGHT CREATES LIGHTING SOLUTIONS THAT FIT YOUR LIFE.**

Streamlight works to deliver products that fit our customers workstyles and lifestyles. Longer run times, more power options - all designed to deliver a product that performs and gets you through the workday or power outage.

PORTABLE USB CHARGER // EPU-5200™ pg. 95

We've made it easier than ever to keep your USB flashlights and mobile devices powered up and ready. You can clip the electronic power unit to a vest and take it anywhere. It's lightweight, yet rugged and durable to stand up to almost anything. And it's also a flashlight! IPX4 water-resistant.

LIGHT + POWER // SUPER SIEGE® LANTERN pg. 36

What happens when you take our industry-leading lantern and engineer an 8800 mAh rechargeable battery in it? Pure perfection. The lithium ion battery supplies the power for the lantern as well as enabling you to recharge all your electronic devices from the handy USB port.

USB RECHARGEABLE LIGHTS

USB compatibility means you're always prepared. The flexibility of a USB port means you can plug in and recharge from your laptop, in your vehicle and from Streamlight USB power sources to ensure your light is always at the ready.

LIGHT UP THE WORLD ANYWHERE YOU WANT.

PORTABLE SCENE LIGHT

The Portable Scene Light provides rapid deployment on site, and it goes anywhere. With its 90° swivel neck, it's easy to shine light into the most out-of-the-way place. The head extends to 72" within seconds. It provides 3 levels of lighting and substantial run time to last through several shifts, even days. The unique diffuser lets you select a flood or spot beam in all three levels. It's designed to adapt to tight spaces, but rugged enough to be stable in wide open terrain or steps. The regulated light provides consistent output throughout the life of the battery. It's an indispensable tool for first responders, construction crews, and utility workers.

WAYPOINT®

This long-distance, pistol-grip lantern is the light you need to inspect a power line from the ground, find a dock from the interior of a lake or to see whatever is way up ahead. Its beam reaches about the length of 6 football fields! It also has plenty of peripheral light, so you can see what's all around you. Set it down to illuminate an entire area or aim it to check on trees or power lines far away. This next generation alkaline model features 3 modes including a strobe for signaling.

THE MOST VERSATILE LANTERN FAMILY
WELCOMES THE HARDEST
WORKING
SIEGE LANTERN.

SUPER SIEGE® RECHARGEABLE LANTERN

The Super Siege® Lantern features five C4® power LEDs, one white and four red with six output modes and a battery level indicator built into the on/off button. A 8800 mAh rechargeable lithium ion battery supplies the power for the lantern as well as enabling you to recharge all your electronic devices from the handy USB port. With the outer lantern globe in place, the light will float. Use the lantern with or without the outer globe cover. Remove the outer globe and hang the body upside down by the D ring for large area lighting needs. Utilize the included "Glare Guard" to shield light from 1/2 the globe, allowing you to direct light on your work zone. A small storage area is provided in the base of the light for all your "keep dry" needs. Simply rotate the bottom cover counter clock wise to remove and access the storage compartment.

THE SIEGE SERIES. THEY'VE GOT SURVIVAL INSTINCTS.

THE SIEGE® LANTERN

The Siege is brighter, more durable, and much more versatile than other emergency/camping lanterns. It's bright enough to light up a whole campsite. It runs for over 30 hours on high, and over 12 days on low! Its handle and D-rings allow you to hang it or clip it almost anywhere, upright or inverted. It has 3 white light settings, a red light for softer, less intense light, and an SOS mode. Remove the top for brighter light. Battery indicator flashes to alert you to low battery.

Versatile design features rugged carry handle and D-rings clip to hang virtually anywhere.

SIEGE® AA LANTERN

The Siege® AA lantern features one C4® power LED, and two red LEDs (or two blue LEDs on the C.O.P.S. model). There are five output modes and a battery level indicator built into the on/off button. With the outer lantern globe in place, the light will float. Use the lantern with or without the outer globe cover. Remove the outer globe and hang the body upside down by the D ring for large area lighting needs. Battery replacement is a breeze with the center post orienting the battery cover correctly every time.

THE MOST TRUSTED RIGHT ANGLE LIGHT. THIN, BRIGHT & VERSATILE. THE LEGENDARY SURVIVOR.

SURVIVOR®

The leading Class I, Div. 1 right angle, clip-on flashlight has been redesigned with a slimmer profile and a new clip/hook for more accurate light orientation. 4 light modes include high, low, flash, and a moonlight mode for low-level lighting that runs for 20 days. Spring-loaded clip easily attaches to belts and harnesses. Comes with two special, interchangeable Smoke Cutter® plugs that help create your preferred beam pattern: Black plug significantly reduces peripheral light for a tighter beam while the Amber plug reduces peripheral light and eye fatigue caused by glare. Available in alkaline and rechargeable models.

All openings are O-ring sealed for weather-resistance. IPX4-rated water-resistant. 2 meter impact resistance tested. Unbreakable, scratch-resistant polycarbonate lens. Designed for easy operation even with heavy gloves.

STREAMLIGHT SAFETY-RATED SERIES.

// DIFFERENT LIGHTS FOR DIFFERENT HAZARDOUS LOCATIONS.

CLASS I locations are made hazardous by the presence of flammable gases, liquids or vapors.

CLASS II locations are hazardous because combustible dusts are present.

CLASS III locations contain easily ignitable fibers or flyings.

The "Division" designation refers to the likelihood that ignitable concentrations of flammable materials are present. There are two divisions:

DIVISION 1 designates an environment where ignitable concentrations of flammable gases, liquids, vapors or dusts can exist some of the time or all of the time under normal operating conditions, or where easily ignitable fibers and flyings are manufactured, handled or used.

DIVISION 2 locations are where ignitable concentrations are not likely to exist under normal operating conditions or where Class 3 materials are stored or handled.

The National Electric Code (NEC) defines hazardous locations by "class" and "division." There are three classes:

GROUP A Acetylene
GROUP B Hydrogen
GROUP C Ethylene, carbon monoxide
GROUP D Propane, gasoline, naphtha, benzene, butane, ethyl alcohol, acetone, methane

GROUP E Metals including aluminum, magnesium (Div. 1 only)
GROUP F Carbonaceous dusts including coal, carbon black, coke
GROUP G Dusts not included in E and F including wood, plastics, flour, starch or grain dusts

®

STREAMLIGHT GIVES YOU MORE SAFETY-RATED LIGHTS FOR MORE OPTIONS IN HAZARDOUS LOCATIONS.

Streamlight flashlights are tested and certified by the world's leading independent laboratories — including Underwriters Laboratories, ATEX, Demko, and the Mine Safety and Health Administration (MSHA). This testing is your assurance that the Streamlight flashlight you choose will be safe in the environment(s) in which you'll be using it.

NFPA®

// STREAMLIGHT'S HAZ-LO LIGHTS - 2 STANDARDS PROVIDE DIFFERENT PATHS TO THE SAME RESULT: A DIVISION 1 RATING!

When working in a Division 1 area, we expect explosive atmospheres to be present. Streamlight's HAZ-LO product line is suitable for use in Division 1 areas. Streamlight uses different protection standards and testing at Nationally Recognized Test Labs (NRTL) to achieve the Division 1 rating that is common to all Streamlight HAZ-LO Lighting. This is the best possible performance while ensuring that your flashlight will not become an ignition source. ANSI/UL 783 is the specific standard for flashlights used in hazardous locations. ANSI/UL 913 is the intrinsically safe standard for general electronic equipment. While either standard can direct certification to Division 1 level, it is important to note Class, Group and Temperature code requirements to select the correct flashlight for specific applications.

// WHY ARE SAFETY RATINGS IMPORTANT?

There are several types of locations in which it can be extremely dangerous to use any light that has not been specifically designed — and approved — for that kind of location. These are areas where fire or explosion hazards may exist due to the presence of flammable gases, liquids, vapors, dusts, or ignitable fibers or flyings. If you will be using a flashlight in any potentially hazardous location, it is critical that your light be safety-rated for that specific kind of environment.

// ATEX RATINGS

Streamlight also offers safety-rated lights that comply with the European Union (EU) Directive 94/9/EC (ATEX) for products intended for use in potentially explosive atmospheres within the EU member countries. Please visit our website, streamlight.com for more information on ATEX-rated products. We also have a catalog of ATEX-rated products available upon request.

STREAMLIGHT STORIES...

"MY 4AA PROPOLYMER MELTED & MUTATED. BUT IT STILL WORKS!"

Your flashlights are amazing! I was using a 4AA ProPolymer along with a torch for preheating. The light got too close to the torch, the torch melted the flashlight ... but it still works! Thanks and please continue making great durable products.

STREAMLIGHT, THE WIDEST ARRAY OF WEAPON-MOUNTED LIGHTS.

At Streamlight, we engineer the highest performing, most rugged, durable and innovative lights on the market. We create lights that add real value... for specific tasks as well as for a wide variety of applications — including the widest array of weapon mounted lights. Whether you're LEO, S.W.A.T., Military, home defense or a sportsman, Streamlight builds the products you can depend on and with the options and configurations that you need.

In developing lights that help our customers work more efficiently, safely, and economically, we've changed the shape of the flashlight industry. And we've literally changed the shape of illumination. Streamlight's cutting edge beam patterns, like our HL and HPL lights, have set new standards, and demonstrated just how practical advanced design can be.

DIFFERENT KINDS OF BEAMS FOR DIFFERENT KINDS OF TASKS.

Visit Streamlight's www.beamdemo.com
and see the differences for yourself.

TRADITION^{SERIES}

This family of flashlights delivers the optimal balance of bright, far-reaching beam, ample peripheral light, and long run times. When you're out in the field or on any job that requires light for long periods, these are the flashlights you want by your side. Their brightness, power, performance, cost, and extended run times make them perfect for a variety of tasks.

HPL^{SERIES}

These High Performance, High Lumen flashlights throw bright light a long distance. They have a bigger hot spot that casts more light on the target with more peripheral light. They're great for illuminating the entire length of a dark alley, for any task that requires a far-reaching beam.

HL^{SERIES}

These High Lumen flashlights have a wide, side-to-side beam. They illuminate an entire area, including what may be hiding in corners. They perform like floodlights, illuminating a whole room, vehicle, or any area with bright, revealing light.

TLR HL FAMILY OF LIGHTS

HIGH-LUMEN DOMINATION THROUGH MAXIMUM ILLUMINATION.

TLR-1 HL®

WHITE LIGHT ILLUMINATOR

This versatile tactical light fits handguns and long-guns, and you can switch from one to the other in seconds. Its wide peripheral beam lets you see what's all around you, including what's lurking in corners. Includes a strobe for signaling/disorienting. Unbreakable, scratch-resistant, gasket-sealed lens. Operates in temperatures from -40°F to +120°F. Impact resistant. Easy, fast battery installation/replacement. The TLR-1 HL is IPX7-rated waterproof to 1 meter for 30 minutes. TLR-2 HL features a 650-660nm red laser and IPX4-rated for water resistance.

THE PERFECT BLEND OF PERFORMANCE + DURABILITY

PROTAC HL® USB

The ProTac HL USB is incredibly bright and features new multiple power source capability. It uses our lithium ion rechargeable battery, two CR123A batteries or an available Li-On 18650 rechargeable battery. It recharges by connecting to a USB port, so it's easy to charge on the go. The anti-rattle battery compartment keeps batteries securely and quietly in place and doesn't need a battery carrier. TEN-TAP® programming lets you choose the selection of operating modes (high/strobe/low, high only or low/medium/high). IPX4 rated for water resistance.

HOWEVER YOU POWER IT.

18650 CHARGER KIT

18650 Lithium-Ion batteries provide an alternate power source for newer Streamlight products that accept either standard CR123A lithium batteries or 18650 batteries. The two bay 18650 battery charger can recharge one 18650 battery in as little as 3.5 hours, or two batteries in as little as 6.5 hours. The charger features dual input power sources, accepting either 5V USB power or traditional AC or 12V DC power sources. Dual input power sources provide a wide variety of battery charging options when a wall outlet is not available, such as a PC, power pack or 12V DC automotive power. Models available with charger, two 18650 batteries and either a 120V AC/micro-USB adapter or custom micro-USB cord.

22010	18650 Charger Kit - USB (includes two 18650 batteries)
22011	18650 Charger Kit - 120V AC (includes two 18650 batteries)
